

My name is Felicia Wells and I am a resident of Mattapan. I have been at Carney for almost two years. I love the people who work here; everyone is so friendly and helpful. Every employee will help patients and families directing them through the hospital.

In my work as a financial counselor, I meet with patients all day. Many of the patients I see are in financial difficulty and are unaware of the available insurance coverage.

I hold their hand and walk them through the application process step by step whether it is Mass Health, Commonwealth Health or the Health Safety Net.

It makes me very happy when the patient walks away with their questions answered and with relief that the financial burden of medical coverage is manageable.

Carney is very important to this community. The patients always talk about the wonderful care they receive here. It is a great place to work. The sale will ensure that Carney is here for another 150 years.

Please approve this sale. Thank you.
